

GLOBAL TACTICS GAME

REFLECTIONS

Write a brief summary of what happened with your country in the simulation. Think about your starting position (as a Tier I, Tier II or Tier III nation) and what resources you began with. Then reflect on what actions your country took to become successful. Make sure to include a discussion of your “international” relations with the other countries in the game. In what ways did you cooperate with other countries? In what ways did you conflict with them? And finally, what would have done differently? Write your tale below. (100 words minimum)

In what ways did the simulation resemble the real world? Include in your explanation how countries in the classroom formed trade blocs and worked together to improve global trade. (25 words minimum)
