## Determining Payroll Tax Withholding

Taxes based on the payroll of a business are called payroll taxes. A business is required by law to withhold certain payroll taxes from employee salaries. All payroll taxes are based on employee total earnings. Therefore, accurate and detailed payroll records must be maintained. Errors in payroll records could cause incorrect payroll tax payments. Federal and state governments may charge a business a penalty for failure to pay correct payroll taxes when they are due. Payroll taxes withheld represent a liability for the employer (they are recorded as payables) until payment is made to the government.

The information used to determine the amount of income tax withheld is identified on Form W-4, Employer's Withholding Allowance Certificate. A deduction from total earnings for each person legally supported by a taxpayer, including the employee, is called a withholding allowance. Employers are required to have a current Form $\mathrm{W}-4$ on file for all employees. The amount of income tax withheld is based on employee marital status and number of withholding allowances. A married employee will have less income tax withheld than a single employee with the same total earnings. The larger the number of withholdings allowances claimed, the smaller amount of income tax withheld.

The amount of federal tax withheld from each employee's total earnings is determined from withholding tables prepared by the IRS; the tables are revised each year. Tables of prepared for various payroll periods - monthly, semimonthly, biweekly, weekly, and daily. The tables shown on the next two pages are semimonthly.

If employee Rick Selby (shown in the $W-4$ above) earned $\$ 1,137.00$ in the current pay period, you would use the married table in the next page to figure his withholding.

1. Make sure you are using the correct table (married, semimonthly)
2. Locate employee's total earnings on the left side of the table ( $\$ 1,120$ to $\$ 1,140$ )
3. Read across until you find the employee's number of withholding allowances (4)

In the case of Rick Selby, he would have $\$ 28$ withheld from his paycheck for federal income tax.

Using the single table above, determine the payroll tax withholding for the following employees:

| Employee <br> $\#$ | Employee Name | Marital <br> Status | Number of <br> Withholding <br> Allowances | Total <br> Earnings | Federal Income Tax <br> Withholding |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2 | Marquez, Lola S. | S | 1 | $\$ 925.00$ |  |
| 7 | Rice, James H. | S | 2 | $\$ 1,000.00$ |  |
| 4 | Cohen, Jason K. | S | 1 | $\$ 840.00$ |  |
| 6 | Key, Sharon C. | S | 2 | $\$ 980.00$ |  |

## Employee Social Security and Medicare Tax

The Federal Insurance Contributions Act (FICA) provides for a federal system of old-age, survivors, disability, and hospital insurance. A federal tax paid for old-age, survivors, and disability insurance is called Social Security tax. A federal tax paid for hospital insurance is called Medicare tax.

Social Security and Medicare taxes are paid by BOTH the employees and employer. Employers are required to withhold and deposit the employee's part of taxes and then pay a matching amount of these taxes as well.

## Social Security

Social Security tax is calculated on employee earnings up to a maximum paid in a calendar year. The maximum amount of earnings on which a tax is calculated is called a tax base. Congress sets the tax base and the tax rates for Social Security tax. The Social Security rate and base are currently $6.2 \%$ of earnings up to a maximum of $\$ 168,600$ in 2024.

## Medicare

Medicare does not have a tax base. Therefore, Medicare tax is calculated on total employee earnings. The current Medicare tax rate is $1.45 \%$ of total employee earnings.

Use the information in the table below to calculate Social Security and Medicare tax withholdings.
NOTE: ALWAYS ROUND TO THE NEAREST CENT.

| Employee <br> $\#$ | Employee Name | Total <br> Earnings | Social Security Tax <br> Withholding <br> $6.2 \%$ (or 0.062) | Medicare Tax <br> Withholding <br> $1.45 \%$ (or 0.0145) |
| :---: | :---: | :---: | :---: | :---: |
| 3 | Bates, Eric C. | $\$ 1,090.00$ |  |  |
| 1 | Grimes, Christi L. | $\$ 840.00$ |  |  |
| 5 | Norris, John F. | $\$ 1,250.00$ |  |  |
| 9 | Vale, Ann M. | $\$ 1,050.00$ |  |  |
| 2 | Marquez, Lola S. | $\$ 925.00$ |  |  |
| 7 | Rice, James H. | $\$ 1,000.00$ |  |  |
| 4 | Cohen, Jason K. | $\$ 840.00$ |  |  |
| 6 | Key, Sharon C. | $\$ 980.00$ |  |  |
