6. micro- _____
7. bronch- _____
8. exo- _____
9. enter- _____
10. homo- _____
11. gastr- _____
12. -megaly _____
13. -emesis _____
14. -ectomy _____
15. labi- _____

Part IV—Medical Report—100 points possible

Key the following report for Dr. Robert Miller using HPIP formatting and today's date for the date of the exam, transcription and dictation. **Print and attach to work for grading. Be sure to include contestant number on work.**

Name: Leonard Ivey

Date: Current

Date of Birth: May 17, 1959

The patient is a 53-year old white male who complained of a sore throat for several days now with signs of an infection. He indicated his phlegm was clear.

No medications.

Physical Examination:

VITAL SIGNS: Blood pressure 120/80, pulse 82, respirations 20, temperature 96.8°.

HEENT: Contusion over right occiput. Tympanic membranes benign.

NECK: Nontender.

CHEST: Atraumatic, nontender.

LUNGS: Clear to auscultation and percussion.

ABDOMEN: Flat, soft, and nontender.

BACK: Atraumatic, nontender.

PELVIS: Stable.

EXTRIMITIES: Contusion over right forearm. No underlying bone deformity or crepitus.

RECTAL: Normal sphincter tone; guaiac negative.

NEUROLOGIC: Glasgow coma scale 15. Pupils equal, round, reactive to light. Patient moves all 4 extremities without focal deficit.

Impression: Severe sore throat; culture taken. Issued prescription for Kelfex, 1 tablet 4x a day.

Plan: The patient is to complete all medications and follow up with the doctor in a week. If throat gets worse, the patient is to contact the office immediately.
